# AQUASTAR™

## FLEXIBLE DESIGN

### WATER MANAGEMENT SYSTEM MANUFACTURER WITH 20 YEARS' WORTH OF EXPERIENCE.

Aquastar is a Korean Ballast Water Management System manufacturer with 20 years' worth of experience.

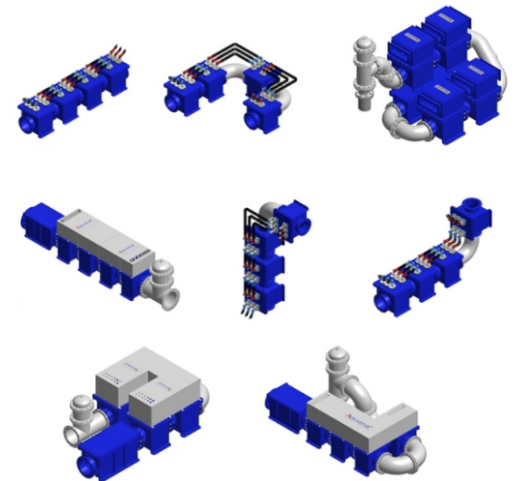

In their system, they employ direct electro-chlorination (In-line configuration), in conjunction with technological advancements, to make AQUASTAR Ballast Water Management System (BWMS) compliant with the requirements of the regulatory bodies and convenient for shipping companies.

The system is well accepted and recognized, as it has been awarded with:

- IMO Basic & Final Approval for BWMS
- ABS Type approval certificate for all BWMS models
- USCG AMS Acceptance and USCG LOI (13/09/2016) and Readiness Evaluation (29/01/2020)
- USCG Type approval (expected within March 2021)

AQUASTAR is considered a trust-worthy option for BWMS, since they have been associated in numerous BWMS projects, both newbuilding and retrofitting, with esteemed shipping companies and reputable shipyards (HHI, DSME, Samsung Heavy Industries etc.).

AQUASTAR provides a cost-effective solution that is characterized by flexibility in the design aspects, technological expertise and efficiency for any project.
