'A PURPOSE-LED AND ENGINEERING-BASED COMPANY

“Valmax” are a Purpose-led, Engineering-based company in Oil & Gas, Petro-Chemical and Power Plant Industry established in Korea.

Our purpose is to provide better solutions for all customers. We use our good engineering, manufacturing skills to reach customer satisfaction for the plant and its future to come. We have been developed successfully to deliver many system packages all over the world.

It has been recognized for its technology in the field of fuel supply systems related to natural gas plants, providing the best solutions from design to maintenance, and has successfully entered the field of fuel supply systems installed on ships using natural gas, both at domestic market and overseas market.

Valmax can satisfy all customers requirements/ preferences since the offer FGSS for all Engine Manufacturers available currently in the market.

Valmax's FGSS is flexible, with diverse options available regarding tank configuration, pressure control system and engine type. Also, Valmax's FGSS can be tailored as necessary to fit individual vessels.

Following items are **Valmax's** major products and solutions.,

- FGSS (Fuel Gas Supply System) for the onshore plant and LNG fueled ship
- CHS (Cargo Handling System) for LNG carrier, LNG FSRU/ FSU, and LNG bunkering vessels
- LNG Reliquefaction System
- Custody Metering system for onshore and offshore oil & gas plant
- Process analyzer system package (GC: Gas Chromatography)
- LNG and hydrogen fueling station
- Small scale LNG Satellite station

Valmax Technology Corporation aim to deliver sustainable solutions for the better

- Fuel Gas Supply System (FGSS)
- Cargo Handling System (CHS)
- LNG Reliquefaction System
